

Howard Little Excavating Ltd.

Salt / Salt and Sand Mix

Howard Little Excavating carries approximately 75 tonne of bulk salt in stock during the winter season. This product can be picked up at our storage site by pick-up trucks or larger.

The primary use of this product is for the melting of ice from roadways, driveways, and sidewalks. We also provide salt and sand mix for use on gravel roadways and when the ambient temperature is too cold for salt to work.
